

Prof. Oxley has only recently joined Universiti Teknologi PETRONAS, in August 2008, as a member of the Computer and Information Sciences Department. His varied working life enables him to see things from different perspectives. He has worked in both industry and in academia. In the latter, he has been a university teacher, a Dean of Information Technology, a university Vice President (responsible for IT services), and a university researcher. He is pleased to join UTP where he finds the facilities are first class. He has been responsible for the design and development of a number of large computer programs. Two of these have been for Computer Assisted Learning of Structural Analysis, whilst the remainder has been for Land Surveying applications in Building and Civil Engineering. He has worked at two state universities in the UK, a branch campus of one private American university in the UK, a university in Papua New Guinea, and two universities in Malaysia.
